

**THE NEXT EDITION OF SAIE3 WILL BE HELD IN BOLOGNA FAIRGROUNDS
FROM 22nd TO 25th OCTOBER 2014 IN CONJUNCTION WITH SAIE.**

Sabatini Group, organizer of **SAIE3** (the first edition was held in March 2013), defined the dates of the next event to be held in **Bologna October 22nd to 25th, 2014**, at the same time the performance of SAIE which will celebrate the 50th edition.

SAIE, the largest exhibition platform of BolognaFiere for the construction industry, which has just ended, has added a new event that further enhances the industry exhibition. The success of SAIE 2013, which proposed a "new format" for the future of construction, showed that a system is the strategic path for the revival of the industry that can only happen through a shared commitment of the construction industry on the topic of "build safe and sustainable."

And ' this belief that gave rise to the exhibition platform this year that he proposed, next to **SAIE** (innovation building, three other highly specialized events: **Smart City Exhibition** (Communication, quality and development in smart cities), **Environment work** (14th Exhibition of health and safety in the workplace).

In **2014**, this network exhibition will be enriched with the second edition of **SAIE3** , offering exciting new opportunities for operators in the construction world.

*"Surely with this agreement is structured to the world of construction and design time most significant exhibition of **2014**" - says **Lucia Alberghini , general manager of SAIE3** - I think is fundamental and important to create synergies between the world of heavy construction and finishings for interiors and exteriors . The visitor has the opportunity to find a great platform that gathers commercial and cultural part . Thank you again Bologna Fiere and the President Campagnoli for having affirmed confidence in our project .*

*"Our work for the new SAIE, - says **Duccio Campagnoli , President of BolognaFiere** - aimed to present the entire supply chain of the construction industry , has added a major new event in the name of a new build and design for the redevelopment of buildings and cities. The contemporaneity of **SAIE** and **SAIE3** consolidates the common goal of proposing a large exhibition platform focused on innovation and research . The synergy between specialized events makes it possible to identify and exploit, the technological aspects and design details that allow for a more intelligent management of the project and its implementation, highlighting the most innovative solutions for sustainability and security. "*

Bologna , 31st October 2013
